P.O. Box 23454, Pleasant Hill, CA. 94523; Voicemail (925) 482-6670

Located At Pleasant Hill Education Center, 1 Santa Barbara Road, Pleasant Hill

---

## **WiFi Networking Technical Support and Service for Weather Station**

### **Volunteer Opportunity**

PHIG has a working Davis Instruments Vantage Pro weather station connected to the Internet for display 24/7 to be both a community resource and at school for PHIG and GLOBE program school use: <http://www.weatherlink.com/user/phig>

Additionally, data is uploaded to the Citizen Weather Observer Network, for even wider use by NOAA and NASA forecasting purposes. Many thanks to Russ, our current technical support guru extraordinaire, and to other contributors. But Russ is moving out of the area! He would be available to discuss the setup/connections in order to continue support and service ongoing and as needed.

We are also interested in setting up an account with Weather Underground this fall and expanding the reporting to the GLOBE program.

**Requirements:** Knowledge of wireless networking and computer technology. Desirable: possibly some familiarity with weather station reporting.

**Contact:** Monika Olsen, teacher, [phigarden@gmail.com](mailto:phigarden@gmail.com); (925) 482-6670

**Donations gladly accepted. PHIG is a 501(c)(3) nonprofit organization.**
